December 27, 1979

Mr William Brandt, Director  
Department of Public Works  
City of Waukegan  
196 North Utica Street  
Waukegan, Illinois 60035

Dear Mr Brandt

Your solid waste disposal facility located south of Yorkhouse Road and east of McAree Road in Waukegan, Illinois was inspected on November 20, 1979, by Jeffrey Stofferahn, representing this Agency

The inspection disclosed that the perimeter drainage ditches around the site have been widened and deepened. Though this has improved the drainage for the site, leachate continues to flow into and pond within these ditches. Some corrective action was noted in stopping some of the leachate seeps, however, much work obviously remains to be done to fully correct this situation

The inspection also disclosed the following condition(s) which constitute violations of the Illinois Environmental Protection Act and Chapter 7 of the Illinois Pollution Control Board Solid Waste Rules and Regulations.

Open burning of leaves was observed in violation of the Environmental Protection Act. All open burning must be discontinued immediately unless and until such open burning is conducted in accordance with the Illinois Pollution Control Board Rules and Regulations, Chapter 2, Part V, regarding open burning

We suggest that you correct the aforementioned violations immediately. An acknowledgement of this letter is requested indicating the corrective action which you have taken or plan to take. Your degree of compliance will determine our next course of action

Sincerely,

Kenneth P Bechely, Northern Region Manager  
Field Operations Section  
Division of Land/Noise Pollution Control
